

HD 25

HD 25, HD 25 LIGHT, HD 25 PLUS

REBOOTING THE LEGEND.

The HD 25 is a true classic that enjoys an excellent reputation in fields as diverse as outside broadcasting, monitoring and DJ-ing. The new line set-up is now more clearly defined with each model clearly differentiated, and ensures that both pro users and consumers will get just the right pair of headphones for their preferred applications.

FOR EASIER PRODUCT SELECTION.

The classic HD 25 is now optimized for its wide range of applications with two sister models – the HD 25 LIGHT, ideal for long mixing sessions due to its lightweight headband, and the HD 25 PLUS, which adds additional accessories to further enhance the classic.

The new versions can be easily recognised by the compact Sennheiser logo on the earpieces, with the version and impedance information now provided on the headband.

HD 25 LIGHT

For long mixing sessions.

HD 25 LIGHT is the entry-level version for demanding consumers and cost-sensitive pro users who are looking for a good pair of mixing and monitoring headphones. The HD 25 LIGHT features a simpler headband design and slightly different drivers but brings a well-defined bass and detailed treble to any monitoring task. The headphones have an impedance of 60 ohms, a maximum SPL of 114dB and a frequency response of 30 to 16,000Hz.

HD 25

The DJ Classic.

The classic HD 25 comes with its iconic split headband, 1.5m single-sided connection cable and a flip-away earcup for single-sided listening. Newly designed headband ends ensure that the earcups lock securely into place, while lightweight aluminium voice coils ensure an excellent transient response. With a frequency response of 16 to 22,000Hz, an impedance of 70 ohms and a maximum SPL of 120dB, the HD 25 lends itself to any monitoring task, whether live recording or in the DJ booth.

HD 25 PLUS

The HD 25 PLUS is identical in design to the HD 25 but spoils its users with extra accessories and two included cables. Users can choose between a coiled steel cable, pre-attached (length: 3m/1m) and a straight, 1.5m steel cable. The PLUS version also comes with a handy storage pouch and a second set of ear pads in a soft velour version.

All HD 25 variants come complete with a screw-on jack adaptor to 1/4" inch (6.3mm).

FEATURES

- Excellent sound reproduction: emphasized bass and lifted treble
- Lightweight and comfortable, even if used for long periods of time
- Extremely rugged, made for daily use
- Capable of handling very high sound pressure levels
- Dual-sided, detachable cable, 3m

FEATURES

- High sensitivity due to lightweight aluminum voice coils
- Capable of handling very high sound pressure levels
- Lightweight and comfortable, even if used for long periods of time
- Tough, detachable, single-sided cable
- Rotatable capsule for single-ear listening
